

When it comes
to **caring**
for **people,**
only **people** will do.

What's true for you
is just as true for us.

In Defran's case, the software matters, too, of course. Evolv-CS is, after all, the software built by human service experts to help you reach your performance goals with accuracy, efficiency and reliability.

But our *people* matter just as much—or more. They get Evolv-CS to give you all it has (which is a lot). They learn your business inside out. They

- ◆ Show you how to **customize** it to your every need
- ◆ **Train** your staff in how to use it best
- ◆ Provide outstanding day-to-day **support**

For 20 years, our people have been what *truly* sets us apart. They'll make Evolv-CS *work* for your organization. They'll be there, right by your side, now and down the road—experienced, knowledgeable and, above all, **effective.**
