

The screenshot shows the top navigation bar with the Roosta logo and 'UNIVERSITY SOLUTIONS' text. The navigation menu includes 'Home', 'RoommateClick', 'ApartmentSource', 'About', 'Contact', and 'Request demo'. The main content area features the heading 'ANSWERS TO THE STUDENT HOUSING PUZZLE' and a paragraph describing the services. Below this are two featured sections: 'RoommateClick' with a description of its robust and secure online tool, and 'ApartmentSource' with a description of its web-based housing listing/search application. A sidebar on the right contains a 'Request an online Demo' link and a 'Site map' link. The footer includes copyright information for 2007 and the Roosta logo.

The screenshot shows the 'RoommateClick University' page. The navigation bar is identical to the home page. The main heading is 'RoommateClick University' followed by the sub-heading 'EMPOWERS STUDENTS TO FIND A PLACE TO LIVE THAT WORKS'. The content is organized into three sections: 'What it does', 'How it does it', and 'What this means to you', each with a detailed description of the service. A 'Learn more about RoommateClick in action' link is located at the bottom of the main content area. The sidebar on the right features a 'Request an online Demo' link and a 'Site map' link. An image of three students sitting on a lawn is positioned below the demo link. The footer contains the same copyright information and Roosta logo as the home page.

RoommateClick University

EMPOWERS STUDENTS TO FIND A PLACE TO LIVE THAT WORKS

What it does
RoommateClick gives students a secure, full-featured environment in which to find their own congenial roommates. They can search using multiple criteria, and then make safe and anonymous initial contact with potential roommates using RoommateClick's full-feature email system.

How it does it
RoommateClick is a free-standing hosted solution that runs on its own central servers and makes no demands on existing university IT infrastructure or technicians. Students and administrators access it using a standard internet browser.

What this means to you
RoommateClick transforms the student housing experience for students and administrators alike. It requires no capital expenditure on software or hardware, can be set up and running in as little as a month, and its implementation raises no security/software compatibility issues.

RoommateClick The Student Experience

Access

Students have full access to all the features of their university's RoommateClick from any computer with a Web connection and a browser. They carry out the entire roommate selection process themselves, and in most cases need no help or support either from university staff or from RoommateClick's technical experts.

The User Profile

On their first visit students create a personal profile by filling out data fields selected by their university's housing department. We also encourage them to write a more personal "free text" description of themselves, to complete a short questionnaire and to upload photos.

The Home Page

On their next and subsequent visits students log on and go directly to their Homepage. This gives them a summary of the contents of their email inbox and easy access to all the features of the site including:

- RoommateClick Search page
- Hotlist
- Full Mailbox
- Edit Profile pages

Searching

Students can use multiple criteria to search for roommates (restricted only by their university's choice of profile fields and search settings). As they sort through the results of their search, they can store potential matches in their Hotlist or contact them right away.

Automatic Alerts

If they wish, students can have RoommateClick alert them automatically by email when a new user signs up with a profile that matches their search criteria.

Secure Communication

Once they've identified potential roommates, students communicate with them via the secure internal RoommateClick email system. This allows them to make initial contact without divulging personal information.

Support

While Roommateclick is robust and straightforward, we know that students will sometimes need a helping hand. As you'd expect, RoommateClick has a powerful, full-featured customer support system. Users have 24/7 access to a knowledge base from which to solve problems on their own behalf, and to live support (during regular office hours) from Roosta University Solutions' dedicated support staff.

RoommateClick The Administrator's Experience

More Efficient and Complete

Not only do students using RoommateClick do their own searching and make their own roommate arrangements, but they enter their own data directly into the system. The result for administrators is a centralized database that

- Is more accurate and comprehensive
- Requires less manual data entry
- Cuts paper work
- Simplifies document management and tracking

Full Control

RoommateClick provides housing administrators with all the tools and procedures they need to ensure adherence to their university's codes of conduct. These include

- Filtering algorithms to flag potentially offensive words
- Physical checking of profiles by Roosta University Solutions staff
- Thumbnail views of new user profiles
- The ability to defer new profile postings until checked
- User flagging of questionable content

ApartmentSource University

ONLINE LISTING AND SEARCH FOR ON- AND OFF-CAMPUS HOUSING

What It Does

ApartmentSource is a hosted Web-based application where a university can list and manage details of its entire housing inventory—and, if it wants, let third-party landlords list theirs, too. Students can search ApartmentSource listings on multiple criteria from any computer with an internet connection.

Fast Implementation, Low Investment

ApartmentSource's fully hosted model means that you can quickly set it to work. It raises no concerns about software compatibility, network security or lengthy implementation. You won't need to buy additional servers or other hardware, and you won't have to train for months to learn how to manage it.

Paperwork Reduction

ApartmentSource reduces the burden of administrative paperwork. Once you have entered an apartment into the system, it and its associated data remain there until you remove them.

Revenue Potential

ApartmentSource can produce an income stream for your university: it includes everything you need in order to charge third-party landlords for listing their properties.

ApartmentSource Interfaces

The Student Interface

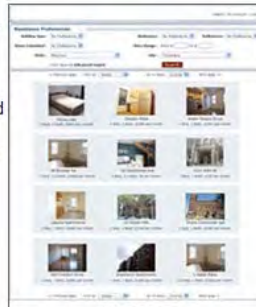

Students can browse or search by location, price range, number of bedrooms and/or bathrooms, ownership/control (university or private) and whether or not the apartment they want is furnished. When they find one that looks interesting, they contact the landlord directly using the preferred method shown in the property detail.

Rollover image to view full size

The Landlord Interface

Third-party landlords with your permission can upload new listings—including photos—and edit or deactivate existing ones directly from their own computers. ApartmentSource includes the capability to charge for this.

Rollover image to view full size

The Housing Administrator Interface

Housing officers use the administrative interface to add and edit university-controlled listings and to monitor and control all activity on ApartmentSource, accept or reject third-party listings, etc.
